Subject: Detailed comments on July 15 Preliminary Draft TMDL

Rick,

Attached is a copy of your draft Temperature TMDL for the Columbia/Snake Rivers with comments, questions, suggestions from me in redline strikeout. Also some embbeded comments using the comment feature of Word, but most of my comments are in [brackets] right in the text. What appears in brackets are more questions or clarifications I think are needed. In other places I just went ahead and made changes I felt necessary using redline strikeout.

I went through the document rather carefully and marked up a lot of things I'd change or try and answer if I was writing it. For the most part, if not entirely, these are not make or break type things. Despite what may seem like a lot of red type it was evident you put a lot of hard work and careful thought into this. I continue to be grateful that you and the folks working with you at EPA took this TMDL on.
